

Jia-qing Zhong Mathematics Award

Introduction

Professor Jia-qing Zhong was very concerned about the development of the mathematics career of China and had striven for it throughout his life. He had repeatedly said that the development of mathematics depended on the active cultivation and selection of outstanding young mathematics talent. He earnestly hopes to establish a fund in China to reward outstanding young mathematicians. In order to commemorate him and achieve his last wish of developing China's mathematics career, some Chinese scholars of mathematics and some Chinese mathematicians in America co-organized the Jia-qing Zhong fund, and set up the Jia-qing Zhong Mathematics Award in 1987.

The Chinese Mathematical Society is commissioned to undertake this award, for commending and awarding the most outstanding graduate students, doctoral students who major in mathematics. This Prize aimed to encourage more young scholars dedicated to the mathematics career, making more remarkable achievements.

Since the year 1988, the Jia-qing Zhong Mathematics Award has been held for twelve sessions, a total of fifty-eight doctoral students and graduate students had won the award, and the winners have all become the backbone in the field of mathematics. The Jia-qing Zhong Mathematics Award has played a favorable role in promoting the development of China's mathematics.
